GETTING MORE TURBINES SPINNING

ELEVON CORPORATE PRESENTATION

ELEVON

Our Origin & Mission.

NorSea + ALS + Wallenius Wilhelmsen +

50+ Years	40+ Years	130 Vessels	2200 Locations
Complex project and maritime logistics	International abnormal loads and specialized logistics	Vessels servicing six continents with a global terminal network	Largest global maritime network in the world

We all could use a little more focus.

In recent years the wind industry has experienced accelerated growth and rapid improvement and innovation, creating challenges and opportunities for project logistics. In response to this change, a network of international businesses have come together to establish a dedicated, forward-looking company called Elevon.

Elevon was conceived to focus exclusively on the wind industry - to grow with the developing needs and expectations of clients.

Elevon was created to confront the problems, challenges and opportunities of project logistics. To live with the question: How can we get more turbines spinning.

OUR COMMITMENT
IS TO THE WIND INDUSTRY
IT'S OUR SOLE FOCUS

The World's First Floating Wind Farm

Project: *Hywind Pilot Project*
Location: *Stord, Norway*
Scope: *This supply base was used to support Equinor's floating wind turbine project, Hywind.*

Our Global Solutions.

Advisory Services

A trusted partner committed to guiding our clients on planning and execution matters.

Our expertise in project logistics advisory includes work in the following strategic and operational areas:

- Feasibility and costing studies
- Sourcing and procurement
- Port planning
- Logistics planning and concept development / solution design
- Technical studies and surveys (lifting. loading, handling and transport)
- Specialty advisory – Any element of the logistics chain and any project phase

Logistics Management & Solutions

Rich expertise across the entire spectrum of project logistics requirements:

- Vessel management & operations
- Port & site management
- Freight forwarding & transportation
- Component handling & equipment
- Warehousing & storage solutions
- Sourcing & procurement
- Subcontractor management
- Integrated logistics

HSSEQ: A comprehensive, preventive and systematic health, safety, security, environmental and quality (HSSEQ) program across project interfaces.

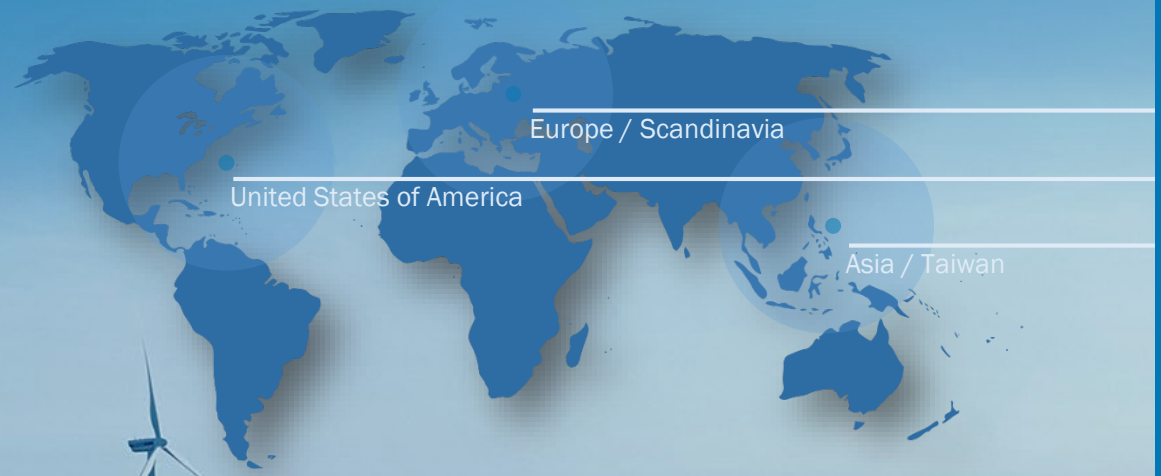

Technical Solutions & Value-Added Services

Technical Services: Through our affiliates, partners and business network we provide technical services in multiple areas:

- Engineering
- Marine operations
- Operations and maintenance support
- Pre-Assembly site services
- Provision of personnel / technicians
- Provision of property, infrastructure and equipment

Information Management & Digital Solutions: A user friendly solution to manage effective logistics operations tailored to the wind industry.

USING OUR **GLOBAL FOOTPRINT**
TO SERVE **LOCAL** NEEDS
AND BUILD **LOCAL STORIES**

ACCESS TO THE LARGEST MARITIME SERVICES NETWORK IN THE WORLD
